SECT. 14. *And be it further enacted*, That gold and silver bullion, brought to the Mint for coinage, shall be received and coined by the proper officers, for the benefit of the depositor: *Provided*, That it shall be lawful to refuse, at the Mint, any

depositor of less value than one hundred dollars, and any bullion so base as to be unsuitable for the operations of the Mint: *And provided, also,* That when gold and silver are combined, if either of these metals be in such small proportion that it cannot be separated advantageously, no allowance shall be made to the depositor for the value of such metal.

SECT. 15. *And be it further enacted,* That when bullion is brought to the Mint for ecoinage, it shall be weighed by the Treasurer, in the presence of the depositor, when practicable, and a receipt given, which shall state the description and weight of the bullion: *Provided,* That when the bullion is in such a state as to require melting before its value can be ascertained, the weight after melting shall be considered as the true weight of the bullion deposited.

SECT. 16. *And be it further enacted,* That from every parcel of bullion deposited for coinage, the Treasurer shall deliver to the Assayer a sufficient portion for the purpose of being assayed; but all such bullion remaining from the operations of the assay, shall be returned to the Treasurer by the Assayer.

SECT. 17. *And be it further enacted,* That the Assayer shall report to the Treasurer the quality or standard of the bullion assayed by him; and he shall also communicate to the Treasurer, such information as will enable him to estimate the amount of the charges hereinafter provided for, to be made to the depositor, for the expenses of converting the bullion into standard metal fit for coinage.

SECT. 18. *And be it further enacted,* That the only subjects of charge by the Mint to the depositor, shall be the following:—For refining, when the bullion is below standard; for toughening, when metals are contained in it which render it unfit for coinage; for copper used for alloy, when the bullion is above standard; for silver introduced into the alloy of gold; and for separating the gold and silver, when these metals exist together in the bullion; and that the rate of these charges shall be fixed, from time to time, by the Director, with the concurrence of the Secretary of the Treasury, so as not to exceed, in their judgment, the actual expense to the Mint of the materials and labour employed in each of the cases aforementioned; and that the amount received from these charges shall be accounted for, and appropriated for defraying the contingent expenses of the Mint.

SECT. 20. *And be it further enacted*, That parcels of bullion shall be, from time to time, transferred by the Treasurer to the Melter and Refiner; that a careful record of these transfers, noting the weight and character of the bullion, shall be kept; and that the bullion thus placed in the hands of the Melter and Refiner, shall be subjected to the several processes which may be necessary to form it into ingots of the legal standard, and of a quality suitable for coinage.

SECT. 21. *And be it further enacted*, That the ingots thus prepared shall be assayed by the Assayer, and if they prove to be within the limits allowed for deviation from the standard, they shall be transferred by the Melter and Refiner to the Treasurer, accompanied by the Assayer's certificate of their fineness; and that a careful record of the transfer shall be kept by the Treasurer.

SECT. 22. *And be it further enacted*, That no ingots of gold shall be used for coinage, of which the quality differs more than two thousandths from the legal standard; and that no ingots of silver shall be used for coinage, of which the quality differs more than three thousandths from the legal standard.

vered to him and received from him, since the last settlement, as an allowance for necessary waste: *Provided*, That this allowance shall not exceed two thousandths of the whole amount of gold and silver bullion, respectively, that had been delivered to him by the Treasurer.

SECT. 24. *And be it further enacted*, That the Treasurer shall, from time to time, deliver over to the Chief Coiner, ingots for the purpose of coinage; that he shall keep a careful record of these transfers, noting the weight and description of the ingots; and that the ingots thus placed in the hands of the Chief Coiner shall be passed through the several processes necessary to make from them coins in all respects conformable to law.

SECT. 25. *And be it further enacted*, That in adjusting the weights of the coins, the following deviations from the standard weight shall not be exceeded in any of the single pieces:—In the dollar and half dollar, one grain and a half; in the quarter dollar, one grain; in the dime and half dime, half a grain; in the gold coins, one quarter of a grain; in the copper coins, one grain in the pennyweight; and that in weighing a large number of pieces together, when delivered from the Chief Coiner to the Treasurer, and from the Treasurer to the depositors, the deviations from the standard weight shall not exceed the following limits: Four pennyweights in one thousand dollars; three pennyweights in one thousand half dollars; two pennyweights in one thousand quarter dollars; one pennyweight in one thousand dimes; one pennyweight in one thousand half dimes; two pennyweights in one thousand eagles; one and a half pennyweight in one thousand half eagles; one pennyweight in one thousand quarter eagles.

Chief Coiner to have ingots delivered to him by Treasurer, and to coin the same.

Allowed variations from the standard weights of the coins.

Chief Coiner shall deliver the coins to the Treasurer, who shall test the legal weight thereof.

Coins to be reserved for the annual assay.

SECT. 27. *And be it further enacted,* That at every delivery of coins made by the Chief Coiner to the Treasurer, it shall be the duty of the Treasurer, in the presence of the Assayer, to take, indiscriminately, a certain number of pieces of each variety for the annual trial of coins, (the number being prescribed by the Director,) which shall be carefully labelled and deposited in a chest appropriated for the purpose, kept under the joint care of the Treasurer and Assayer, and so secured that neither can have access to its contents without the presence of the other.

inconvenient to do so, in which case the denominations of coin shall be designated by the Director.

SECT. 31. *And be it further enacted,* That, for the purpose of enabling the Mint to make the returns to depositors with as little delay as possible, it shall be the duty of the Secretary of the Treasury to keep in the said Mint, when the state of the Treasury will admit thereof, a deposite of such amount of public money, or of bullion procured for the purpose, as he shall judge convenient and necessary, not exceeding one million of dollars, out of which those who bring bullion to the Mint may be paid the value thereof, as soon as practicable after this value has been ascertained; that the bullion so deposited shall become the property of the United States; that no discount or interest shall be charged on money so advanced; and that the Secretary of the Treasury may at any time withdraw the said deposite, or any part thereof, or may, at his discretion, allow the coins formed at the Mint to be given for their equivalent in other money.

VII. OLD STANDARDS AND WEIGHTS OF COINS.

SILVER COINS.

Old standard
and weights
of silver
coins.

Be it enacted, &c., That the standard for all silver coins of the United States shall be one thousand four hundred and eighty-five parts fine, to one hundred and seventy-nine parts alloy; and, accordingly, that one thousand four hundred and eighty-five parts, in one thousand six hundred and sixty-four parts of the entire weight of each of the said coins, shall consist of pure silver, and the remaining one hundred and seventy-nine parts of alloy, which alloy shall be wholly of copper. (Act of April 2d, 1792, Sect. 13.) [This standard corresponds to 892.4 thousandths, nearly.]

By Sect. 9 of the same act, the weight of the dollar is fixed at four hundred and sixteen grains of the above standard, and the weight of the parts of the dollar in proportion.

This standard and weight were retained until the end of the year 1836, and the coins of this period are still legal tenders of payment.

GOLD COINS.

Old stan-
dard and
weights of
gold coins.

Be it enacted, &c., That the standard for all gold coins of the United States shall be eleven parts fine to one part alloy; and, accordingly, that eleven parts in twelve of the entire weight of each of the said coins shall consist of pure gold, and the remaining one twelfth part of alloy; and the said alloy shall be composed of silver and copper, not exceeding one half silver, as shall be found convenient. (Act of April 2, 1792, part of Sect. 12.)

This standard corresponds to twenty-two carats, or to 916 $\frac{2}{3}$ thousandths.

By Sect. 9 of the same act, the weight of the eagle was fixed at two hundred and seventy grains, and the weight of the half and quarter eagle in proportion.

This standard and weight were retained until the end of July, 1834, when the following enactments came into force.

Be it enacted, &c., That the gold coins of the United States shall contain the following quantities of metal; that is to say,—each eagle shall contain two hundred and thirty-two grains of pure gold, and two hundred and fifty-eight grains of standard gold; each half eagle, one hundred and sixteen grains of pure

gold, and one hundred and twenty-nine grains of standard gold; each quarter eagle shall contain fifty-eight grains of pure gold, and sixty-four and a half grains of standard gold. Every such eagle shall be of the value of ten dollars; every such half eagle shall be of the value of five dollars; and every such quarter eagle shall be of the value of two dollars and fifty cents. And the said gold coins shall be received in all payments, when of full weight, according to their said respective values; and, when of less than full weight, at less values, proportioned to their respective actual weights. (Act of June 28th, 1834, Sect. 1.)

Be it further enacted, That all gold coins of the United States, minted anterior to the thirty-first day of July next, shall be receivable in all payments at the rate of ninety-four and eight-tenths of a cent per pennyweight. (Sect. 3 of the same act.)

The above standard, which corresponds to 21 carats $2\frac{1}{3}$ grains, or 899.225 thousandths, continued until the act of January, 1837, when it was changed to 900 thousandths. The weights of the gold coins were not, however, altered; and all gold coins made after July 31, 1834, are legal tenders, according to their nominal values.
